Education

BS Artificial Intelligence

The Islamia University of Bahawalpur, Main Campus

CGPA: 3.68/ 4.00

Sept 2022 – June 2026

Projects

➤ AI Competitor Analysis System (FYP)

- Developed an AI-powered competitor analysis system using company and competitor website URLs
- Extracted website content through web scraping and automated data collection
- Integrated LLMs to analyze data and generate structured JSON-based insights
- Compared products, services, strengths, and market positioning of competitors
- Gained practical experience in AI, web scraping, data analysis, and automation
- Built using Python, LLM APIs, and modern data processing tools

➤ Automation Workflow using n8n

- Designed and developed an automated workflow to handle tasks and generate replies automatically
- Integrated multiple services to reduce manual effort and improve efficiency
- Gained practical experience in workflow automation and real-world problem solving
- Built using modern automation tools and deployed for testing

➤ Agentic AI Assistant

- Developed an AI-based assistant capable of performing tasks and responding intelligently
- Implemented basic agentic workflows for decision-making and task execution
- Explored real-world applications of autonomous AI systems
- Strengthened understanding of AI behavior and automation

➤ Machine Learning Model

- Built a machine learning model to analyze data and make predictions
- Performed data preprocessing, training, and evaluation
- Improved understanding of supervised learning and model performance

➤ Deep Learning Project

- Developed a neural network model using deep learning techniques
- Improved prediction accuracy using advanced algorithms
- Gained hands-on experience with model training and optimization

Technical Skills

Programming Languages: Python, java

Agentic AI: N8N

Frameworks and Libraries: Pandas, NumPy, TensorFlow, Seaborn, Matplotlib

Databases: SQL

Software and Developer Tools: Git, GitHub, Hugging Face, VS Code, Streamlit

Extracurricular Activities

- LeetCode & Educational Guidance
Solving algorithmic problems with a focus on deep understanding; sharing concise video explanations on LinkedIn to support peer learning.
- Participated in academic events and workshops, Department of AI, Islamia University Bahawalpur
- Engaged in department training on Machine Learning

Certificates

[Python](#)-Boot.dev

[OOP](#)-Boot.dev

Generative AI Application Developer Certificate-UETIANS Lahore Endowment Foundation, USA

Data Science- Skilled Score
